QUALITY ACHIEVEMENT

“

MPB has HACCP certification for Mikrokleen pepper products in October 2010 issued by Ministry of Health. This certification is important to the MPB because:

- Product quality control needs fuelled by foreign buyers increasingly tight
- Enable the international market as well as MPB compete to maintain existing market
- A "marketing tool" for the MPB for exploring new markets
- Guarantee the quality of products produced

KKM-163/I/53/M42

This certification earned by MPB after a lot of process improvements in procedures and physically for steam heat treatment processing activities
